

Znk – Innovative SAP add-ons: YAC with SharePoint

YAC - All you SAP documents accessible anywhere from any device Integration with MS SharePoint Online – **Maintenance** Demo Screen Captures

Znk Consulting Sàrl, 2020

YAC – Your Attachments Connector Demo

Maintenance – Orders, Functional Locations and Partners

- Attachments to Functional Locations, SAP to SharePoint
- Attachments to Orders, SAP to SharePoint
- SAP UIs, Fiori Apps, WebDynpro, SAP DMS
- YAC Configuration: SharePoint, Metadata
- SharePoint « Workspaces »: Different possible views
- Maintenance Worker on Mobile device: Add photo to Order
- Retrieve photo from Order in SAP with 2-Way AutoSync

Order	Location	Partner	Name
4000050	BRE2-B1-F1-R2	5000050	EC
4000051	BRE2-F05-470	5000050	EC
4000061	BRE2-F05-450	5000050	EC
4000062	BERL-F05-450	5000050	EC
4000063	BERL-F05-475	5000050	EC
4000167	BERL-F06-450	50000400	SCIC
4000168	BERL-F06-450	50000050	EC

- Order, Location and Partner are defined as Metadata in SharePoint
- + Source added also as 4th Metadata to identify to which SAP object the document is attached
- + User added as 5th Metadata to store the SAP user

Views in SharePoint

 Selecting the view « Maintenance » already displays the Metadata in columns, we'll see how it looks like when documents are coming...

- For Orders we've configured YAC so that the order description is added to the Order folder, easier for later retrieval by worker
- We could also have an upper folder per work center, requester, etc.
- All metadata have values here as an order is linked to a Location and a Partner; Source is up to date

Documents > Maintenance > MaintenanceOrder > 000004000168-Control Seats

- YAC Configuration: SharePoint, Metadata
- SharePoint « Workspaces »: Different possible views
- Maintenance Worker on Mobile device: Add photo to Order
- Retrieve photo from Order in SAP with 2-Way AutoSync

YAC Supports all SAP User Interfaces

 As YAC is implemented as pure ABAP and plugged directly into the central attachment functions of SAP, it natively supports all attachments types and all User Interfaces: SAP GUI, WebGUI, WebDynpro, Fiori Apps, etc.

YAC Supports all SAP User Interfaces – Fiori Apps

Fiori Apps support Drag & Drop

Inka

Consulting

5

Maintenan

Source \sim

PurchasingCont

- Once the attachment is added to the App and saved it is automatically sent to **SharePoint**
- In SharePoint, it is stored within automatically generated folder structure, with configured metadata/SharePoint attributes
 - 2-Way AutoSync is fully supported, document added in SharePoint visible in Fiori !

Location \sim

Order 🗸

WebDynpro and SAP DMS

- WebDynpro attachments are also fully supported, as well as integration with SAP DMS as for example in the Maintenance Order WebDynpro below
- 2-Way AutoSync also works, documents added in SharePoint are automatically added to corresponding SAP DMS object (DIR) and visible in DMS Fiori Apps and WebDynpros

< SAP Change Product reque	est order: 4000080

YAC SharePoint Configuration

 For SharePoint Online: 2 RFC destinations must be defined, one to your SharePoint site, one to the standard Microsoft Security Token Server

Connection Edit Goto Extras Utilities System Help	Connection Edit Goto Extr <u>a</u> s Utilities System Help					
Ø □ 4 B + Ø 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0	8 I I I I I I I I I I I I I I I I I I I					
RFC Destination MSSP	RFC Destination MSSP_STS					
Connection Test 🦻	Connection Test					
RFC Destination MSSP Connection Type G HTTP Connection to External Server Description Description	RFC Destination MSSP_STS Connection Type G HTTP Connection to External Server Description Description					
Administration Technical Settings Logon & Security Special Options Target System Settings Host znkconsulting.sharepoint.com Port Path Prefix Port Port	Administration Technical Settings Logon & Security Special Options Target System Settings Index of the security Index of the security Index of the security Host Iogin.microsoftonline.com Port Index of the security Path Prefix /extSTS.srf					

 Then in YAC you have to indicate which are the RFCs to be used and the user-id/password of the SharePoint 'YAC' user

Display View "YAC Setup MS SharePoint Secure Token Service Configurati

Z				
	YAC Setup MS SharePoint Secure Token	Service Configuration		
	MSSP Server	MS STS Server	User Name	Password
	MSSP	MSSP_STS	karim.benakli@znkconsulting.onmicrosoft.com	

YAC Target Folders Configuration

- By default the folder where the attachments are stored is created as
 - <ObjectDescription>(<ObjectType>)/<ObjectKey>
 - E.g.: .../MaintenanceOrder(BUS2007)/000004000050
- However this is freely configurable, system fields can be used as well as fields coming from the tables of the object.
- For our demo we've configured the Maintenance Order folder so that the order description is added to the object key:

YAC Metadata Configuration

- Metadata values can be freely configure by making use of system tables, objects tables data and function modules
- For this demo the following configuration is used:

Display View "YAC Setup of Metadata to be sent with Attachments": Over

🎾 🖪 🖪 🚯 YAC Setup of Metadata to be sent with Attachments Metadata Value Object type Metadata Name Source <objtxt> User <resp> <objkey> BUS0010 Location BUS2007 <YAC_META_FM_MAINTENANCE=02> Location Order0 <aufk-ktext> (<aufk-aufnr>) BUS2007 <YAC META FM MAINTENANCE=01> BUS2007 Partner

- Part of the configuration is for all objects, other part is object specific
- YAC_META_FM_MAINTENANCE is a function module used for returning the Partner (with 01) and Functional Location (with 02) as a small logic is required to achieve this (the information is not directly available in the order tables)

- Attachments to Functional Locations, SAP to SharePoint
- Attachments to Orders, SAP to SharePoint
- SAP UIs, Fiori Apps, WebDynpro, SAP DMS
- YAC Configuration: SharePoint, Metadata
- SharePoint « Workspaces »: Different possible views
- Maintenance Worker on Mobile device: Add photo to Order
- Retrieve photo from Order in SAP with 2-Way AutoSync

SharePoint Views

- SharePoint views can be very easily defined and configured on basis of various elements, including metadata.
- For the demo we've defined 4 views:

SharePoint View – Maintenance Locations
